We have in this country a great number of organizations and associations, all of which, are a number of people united together for a certain purpose. Nearly all of these orders and organizations claim that they are a benefit to the people of their community,

which we do not dispute. But, we think there is room for another organization, a greater one, one that will be of more benefit to our people than all of the other organizations put together... This organization we will call the T. B. A, association, or, (The Buy America Association), and all those who join would pickee themselves to buy nothing but what is manufactured or produced in America, and it would have to bear a tag

or sticker guaranteeing same. This organization would be a great blessing to the housewives of the country, as it would put their husbands to work, and the necessities of life denied them now, they would then be able to have. If we can not get our Government to protect us, we can join together and protect ourselves
